# WELDED WIRE MESH PANELS

The welded wire mesh panels made by Van Merksteijn excel both in stability and durability. This high quality is ensured by the use of top-quality materials and their careful processing using state-of-the-art production techniques.

Our fencing panels thus meet the highest safety and quality standards in the market. Because we manage all facets of the production in-house, we can continuously guarantee these high demands for you.

Single wire panels with a V beam are called “3D panels”, the double wire panels are called “2D panels” and for really high security perimeter we produce anti climb panels, they are called “Secufence” panels because of the very narrow mesh.

Together with the right type of post and fixing Van Merksteijn will supply you with a tailor made fencing system.
