

VM II V-FENCE

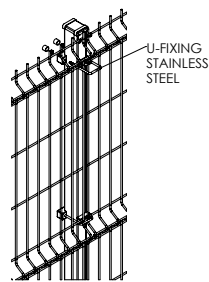

V-FENCE VM II

The V FENCE profiled panel is an aesthetically attractive and at the same time cost-efficient alternative for our more rigid DUOFENCE panel. The special 3D technique ensures that in spite of its limited weight this profiled panel is still amazing stable. The mesh patterns of 50x200mm in combination with 1x5mm horizontal and 1x5mm vertical wires ensures a sufficient perimeter solution for example light industrial areas, schools or housing projects.

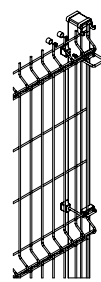

The fence system VM II offers an excellent price/quality ratio and can be used for a wide range of applications. The RHS post profiles are easy to install by digging or ramming. With our approved U-bracket system it is a strong and efficient solution.
